

MACHINE-APPLIED HINGES

Each side of our machine-applied hinge has a set of insertion prongs...some with a combination of a long center prong and two outer stabilizer prongs; others with a pair of long outer prongs and a decorative center, providing both an aesthetic and secure application.

Craft Inc.® manufactures our machine-applied hinges to be pleasing in appearance to enhance the overall appeal of your wooden boxes. They can be easily applied with our ACHM, and CHM machines.
